

THE STUDENT MILLIONAIRE MINUTES

The Student Millionaire is about making expecting to be a Millionaire among Young Adults as common as expecting to graduate from High School.

The accompanying Student Millionaire Minutes are one-minute texts to be read one minute a day, in sequence, repeating the ten minutes every two weeks throughout the school year. This will begin to get our Young Adults to start thinking this way, to develop a Wealth Mindset.

All self-made Millionaires have one thing in common – the Mindset necessary to become and be a Millionaire.

The Student Millionaire teaches Young Adults how to acquire, develop and apply that Mindset in their quest to make their *First* Million Dollars.

This simple knowledge has stood the test of time for a century.

All self-made Millionaires will acknowledge that becoming a Millionaire is a process and that process requires a reasonable amount of time. And this Process is both teachable and learnable.

And though the process is the same for everyone, the path to wealth is unique to the individual. *The Student Millionaire* guides Young Adults to find *their* path to their *First* Million Dollars.

The purpose for The Student Millionaire is to teach Young Adults how they can use their God-given talents and gifts to be financially free early in life, bless the lives of others and make this world a better place.

Teaching our students to be comfortable thinking this way gives them an additional powerful tool in their arsenal of career choices.
